Malware spreadation

Hi guys i need ways to spread malware. I tought of those free valorant skin changer kind of shit but i need a gmail acc + a new account probably wont get too many views. Im targeting mainly normal windows users + gamers since theyr mostly broke and cant afford edr and the shitty free ones will be no problem to me. Servers would be great too but this is a cryptominer so itll get noticed pretty quick even tough its custom made. Appreciate any help ty in advance.

- Thank you!
It worked perfectly for almost a month, and now, when I try to close the program, it freezes. The same happens even after a clean reinstallation on Windows 11. What could be causing this?
